

SQIP-0002

Permission Protocol Spec

Allows creative tools to read/write based on agent role declarations.

Defines 'can_read', 'can_write', and 'notify' lists per agent.

...

SQIP-0003

Cue Sheet Synchronization

Defines time-based coordination of actions across tools.

Used in conjunction with scene + permission files.

...

SQIP-0004

Dual Flow Architecture

Describes Option 1: Fully Automated Agent Chain.

And Option 2: Manual Handoff Model.

Supports creative interop via scene.json and permission.json.

...

SQIP-0005

Federation + Fallback Agent Logic

Overview:

Enables multi-agent collaboration in creative workflows, with fallback systems for unavailable agents.

Architecture:

- Declare agent roles (e.g. voice, music)
- Provide fallback list
- Runtime substitution and output logging
- Supports signing and verification

Benefits:

- Graceful degradation
- Modular plug-in/out
- Agent trust enforcement

Status: Draft
